

Installation Information

The RCB-xx is a 6 Pin Conxall socket connector overmolded onto a Setcom custom unterminated cable, it is used to build Setcom's radio cables for Setcom's intercom systems.

The RCB-xx can be used with any Setcom intercom system. The "xx" indicates feet. Standard cable lengths are 6, 15, 18 Feet. Other lengths maybe available, however, if it is a non-standard length it will **NOT** have an overmolded connector on it.

Systems include: 1600, 1300, 950/977 & 900 Series Setcom Intercom systems.

Note: a RIM-900-BAL is also required if using the RCB-xx cable with Setcom's 900 series intercoms

RCB-xx Cable

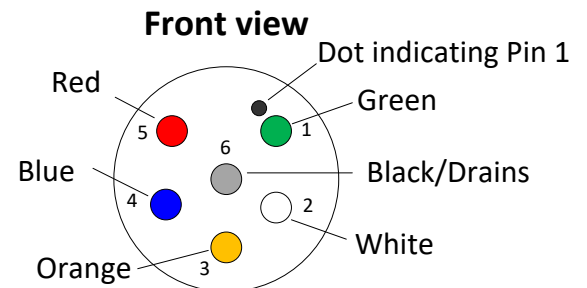

Not to scale.

Wire Color & Function

Pin#	Wire Color	Function
1	Green	PTT
2	White	Spkr High
